

# NEED TO GET RID OF A TREE-RELATED FIRE HAZARD?

Let us help you take care of it!

**Call Tree San Diego** and we'll take care of the hassle of working with the tree removal specialists while also making sure the tree helps our local economy and the environment to the greatest extent possible. We'll solicit multiple quotes for you to choose from, and our efforts will work toward giving your tree a second beautiful life in the form of furniture, musical instruments, or soil to support the next generation of trees.

The best part of choosing Tree San Diego is, we won't charge you a dime. We're non-profit! You'll still need to pay for the costs of the tree removal contractor but we can help reduce those costs by finding salvagers to pick up the trees thus negating the arborist's transport and dumping costs. All we ask in return is for you to replace each of the trees that are removed, either sign our tree replacement form or consult the list of low-water-use trees for the Rancho Santa Fe landscape linked below.

Call or email Cody Harrison at 434-242-6879 or [charrison@treesandiego.org](mailto:charrison@treesandiego.org) to discuss your options. Please text or email some pictures of the tree right before calling.
